Tips for Enhancing Heat Pipe Design

December 2014 Edition

This newsletter on SelectPlus selection software is a service of HPT, Inc. It is meant to familiarize users with SelectPlus and highlight its capabilities through a series of tips and training videos. [Click Here to Login](#)

Outputting Project Reports & Submittals

The report feature on SelectPlus allows users to export selections to a PDF, Word, or Excel document. The report will include design performance, psychrometrics, bin analysis and drawings for a single selection.

A formal submittal document can also be easily outputted for your entire project. In addition to the project report, this document will contain various cut sheets and warranty information. [Watch & Learn](#)

Copying Selections in Your Project

SelectPlus has a feature that allows users to copy selections within a project. This allows users to quickly output multiple heat pipe selections with similar inputs.

This feature not only allows users to copy selections within a project, but also copy to any project within the user's Active Project List. [Watch & Learn](#)
