January 2015 Edition

This newsletter on SelectPlus is a service of HPT, Inc. It is meant to familiarize users with SelectPlus and highlight its capabilities through a series of tips and training videos. [Click Here to Login](#)

Design a Controllable Wrap Around Heat Pipe

In applications where precise temperature control is required, HPT dehumidifier heat pipes can be equipped with normally open solenoid valves (24V or 110V). Control valves are grouped in stages to connect to the building BAS.

SelectPlus allows users to design controllable wrap around heat pipes for temperature control applications. Users can run performances, view psychrometrics, and use the advanced economic analysis feature for accurate savings. [Watch & Learn](#)

How to Add Users to Your Project

SelectPlus allows you to share projects with other users within the SelectPlus database. Permission levels range from read only access to project administrator. This allows for seamless interaction between your colleagues, HPT representatives, and the factory. [Watch & Learn](#)
