*Tips for Enhancing Heat Pipe Design*

## September 2014 Edition

This newsletter on SelectPlus is a service of HPT, Inc. It is meant to familiarize users with SelectPlus and highlight its capabilities through a series of tips and training videos. [Click Here to Login](#)

### How to Design a Cost Effective Method for Passive Dehumidification

Wrap around heat pipes can save energy and enhance dehumidification either by replacing or minimizing expensive reheat, or by reducing the Sensible Heat Ratio of the A/C equipment.

SelectPlus allows users to design wrap around heat pipes for their air conditioning systems. Users can run performances, view psychrometrics, and use the advanced economic analysis feature for accurate savings. [Watch & Learn](#)

## How to Add Users to Your Project

SelectPlus allows you to share projects with other users within the SelectPlus database. Permission levels range from read only access to project administrator. This allows for seamless interaction between your colleagues, HPT representatives, and the factory. [Watch & Learn](#)
